

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A foam-generating kit comprising:
 - A. a non-aerosol container comprising a foam-generating dispenser for generating a foam; and
 - B. a high viscosity dishwashing composition comprising at least one of a microemulsion and a protomicroemulsion, said dishwashing composition having a viscosity of at least about 0.05 Pa*s Pas,wherein when employed with the high viscosity composition, the foam-generating dispenser generates a foam having a foam to weight ratio of greater than about 2 mL/g.
2. (Currently Amended) The foam-generating kit according to Claim 1, wherein the high viscosity composition has a viscosity of from about 0.05 Pa*s Pas to about 10 Pa*s Pas.
3. (Original) The foam-generating kit according to Claim 1, wherein the foam-generating dispenser comprises at least three meshes, wherein the high viscosity composition flows through the three meshes in series so as to generate the foam.
4. (Original) The foam-generating kit according to Claim 1, wherein the high viscosity composition is a Newtonian Fluid.
5. (Original) The foam-generating kit according to Claim 1, wherein the high viscosity composition further comprises an enzyme.
6. (Original) The foam-generating kit according to Claim 1, further comprising a shaped applicator.

7. (Currently Amended) The foam-generating kit according to Claim 1[[,]] wherein the high viscosity composition ~~is selected from the group consisting of a microemulsion and a protomicroemulsion~~ comprises non-visible droplets of oil.
8. (Currently Amended) The foam-generating kit of Claim 1[[,]] wherein the non-aerosol container is a single compartment container ~~high viscosity composition is a selected from the group consisting of a cleaning composition, a polishing composition, an adhesive composition, an insulating composition, a moisturizing composition, a coloring/dyeing composition, a food, a drink, and a mixture thereof.~~
9. (Original) The foam-generating kit of Claim 1, wherein the foam-generating dispenser comprises a sponge.

Claim 10 (Canceled)

11. (New) A foam-generating kit according to Claim 1 wherein said high viscosity dishwashing composition is in the form of a microemulsion.
12. (New) A foam-generating kit according to Claim 1 wherein said high viscosity dishwashing composition is in the form of a protomicroemulsion.
13. (New) A foam-generating kit according to Claim 7 wherein said non-visible droplets of oil have a maximum diameter of less than about 100 angstroms as measured by ISO method 7027.
14. (New) The foam-generating kit according to Claim 1 wherein the microemulsion or protomicroemulsion comprises a low water-soluble oil having a solubility in water of less than about 5,000 ppm.
15. (New) The foam-generating kit according to Claim 14 wherein the low water-soluble oil is selected from the group consisting of: terpenes, isoparaffins, and mixtures thereof.
